ABOUT THE APCO FRAMEWORK

The APCO Packaging Sustainability Framework (the Framework) aims to provide a consistent and transparent framework for assessing and tracking packaging sustainability across organisations. The Framework consists of thirteen independent criteria that belong to three separate categories. These categories are (i) Leadership, (ii) Packaging Outcomes and (iii) Operations. The diagram above shows the different criteria included within each of these three categories.

There are two types of criteria within the Framework:

- **Core criteria** are mandatory and must be answered by all Members when completing the Annual Reporting Tool.
- **Recommended criteria** are not mandatory, but Members are encouraged to complete as many recommended criteria as possible.

Each criteria is divided into five levels of performance ranging from 'getting started' to 'beyond best practice'. The diagram above illustrates the key differences between performance levels. Please see www.packagingcovenant.org.au for more information.

ABOUT APCO

APCO is a co-regulatory, not for profit organisation that partners with government and industry to reduce the harmful impact of packaging on the Australian environment. APCO promotes sustainable design and recycling initiatives, waste to landfill reduction activities and circular economy projects. APCO Annual Reports are a key Membership obligation, providing Member organisations with a transparent method to track their packaging sustainability performance. Annual reporting also supplies APCO with valuable data and information to identify industry trends and advancements.

FREE FORM QUESTIONS

Describe initiatives, processes or practices that you have implemented during your chosen reporting period that have improved packaging sustainability.

During the reporting period we continued to execute our sustainable packaging strategy and integrate it throughout our business. Each business unit continues to have dedicated working groups focused on improving packaging sustainability for each of their brands and contributing to the achievement to our 2025 targets.

We have seen positive improvement in our packaging sustainability initiatives, a number of them resulting from collaboration with others. This includes with our suppliers, recycling partners, APCO and RedCycle, with whom we became a member of during 2019.

In 2019, we also commenced using the Packaging Recyclability Evaluation Portal (PREP) and rolling out the Australasian Recycling Label (ARL). The use of both PREP and the ARL has been instrumental in understanding which of our packaging is technically recyclable in Australia and which requires improvement. It has also enabled us to establish a clear baseline and further build on our plans to achieve our 2025 goals.

We have also started to see the initial results of our teams work as they progress towards achieving our targets, including the phase out of problematic PVC packaging, considerable improvement in our hanger reuse rates and an increase in the use of renewable materials to name a few, all of which we look forward to continuing to build upon throughout 2020 and beyond.
